

You Can Make a Real Difference

Motor Neurone Disease (MND) is a rare disease. The condition is fatal. Every year MND affects around 25 people and their families across Shropshire and Montgomeryshire.

Omega is urgently seeking personal donations, fundraising partners, and sponsorship from successful businesses to buy versatile iPad computers for MND patients.

You can work with Omega to provide the next iPad and specialized communication software, to help a local MND patient 'talk' to their family and their medical team through easy-to-use speech synthesis technology.

It costs £700 to make a real difference. Every day is precious. So we must act quickly. Get involved now. We have set ourselves a realistic target of 10 iPads. You can monitor progress via our website, www.omega.uk.net.

You Can Help By:

- Volunteering to share your skills and talent
- Helping us to promote the appeal
- Organising a fundraising event
- Pledging a regular affordable monthly payment
- Making a donation
- Providing help in kind
